## EXPERIENCE

### Software Engineer

#### Entain

09/2020 - Present Sofia, Bulgaria

Work at Entain is marked by continuous learning and improvement, with the company's scale and product portfolio presenting unique challenges to overcome. My key responsibilities include:

- optimizing and enhancing existing features, as well as implementing new ones
- refactoring legacy code using Angular 10+, SaaS, and TypeScript
- conducting peer-to-peer code reviews to ensure only high-quality code is merged into the master branch
- collaborating with business stakeholders to deliver desired feature outcomes within reasonable timeframes

### Software Engineer

#### Freelance

01/2020 - 08/2020 Sofia, Bulgaria

Over several months, I freelanced on a diverse range of projects, both large and small. Some of my notable accomplishments include:

- developed a personal project utilizing NestJS for the backend, TypeOrm as the data layer, and MySQL for database management
- implemented a secure login functionality using JWT tokens and Passport.js
- initiated a truck check-in project from scratch, leveraging Angular 9 and Material UI. Incorporated the HERE Maps API for positioning services

### Full Stack Developer

#### Princess MOA

06/2017 - 12/2019 Sofia, Bulgaria

I had the opportunity to learn from some of the best people in the industry and for about a year and a half I have come a long way in my professional career path.

- I have worked extensively almost from the beginning on building an app for a document management system with Angular with material UI.
- participated in improving an app for recording data from loggers for sports events in this project we used PrimeNG
- was a mentor for the new developers and helped improve their skills

### Front-end designer

#### Smartway.bg

02/2017 - 05/2017 Sofia, Bulgaria

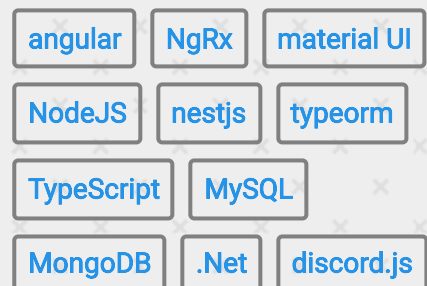

Redesigning dvetelepti.com was my assignment on this charity related website. My part of the project was to make every page mobile-friendly as it

## SUMMARY

As a goal-oriented professional, I am committed to overcoming challenges and delivering optimal solutions within set deadlines. I place a high emphasis on effective team communication and demonstrate adaptability to meet team needs.

## TECHNOLOGIES

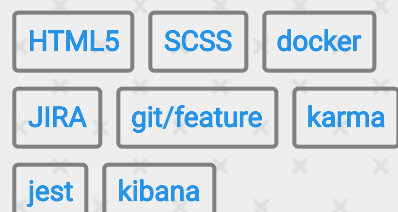

### Coding

### Web

### Others

## LANGUAGES

English

Proficient

Bulgarian

Native

was already done for the desktop version.

- the header and the menu were simplified and adapted for mobile
- for mobile, the carousel was replaced with displaying each category instead
- added grid gallery on the homepage and new design for login page
- user profile, campaigns, single campaign and additional tweaks for all pages were made for mobile

## EDUCATION

---

### JavaScript Web Developer

SoftUni

 2017 - 2019  Sofia, Bulgaria

I have successfully completed the whole curriculum of JS developer at SoftUni and those are some of the most notable courses.

- ExpressJS Fundamentals [↗](#)
